

## Agenda Item VIII.A.

**Meeting Date:** September 5, 2023

**Department:** Amherst County Service Authority

**Topic:** **Raw Water Permit-James River Pump Station Project Update**

**Board Action:** The Board is receiving a presentation regarding the status of the ACSA Raw Water Permit - James River Pump Station Project.

**Attachment:**

1. Raw Water Permit Presentation PDF

**Summary:** The James River Raw Water Pump Station Project was developed due to information that a permanent Raw Water pumping station was authorized/required as part of the ACSA DEQ VWP permit. In a meeting with DEQ, it was determined that such a station was authorized but not a requirement. Further, the special conditions of the VWP only allowed for James River water to be withdrawn when the ACSA reservoir reaches certain levels. Data was presented to the ACSA Board of Directors at their August 1st Regular Meeting, where, after receiving all the information presented, they moved to postpone this project indefinitely.

**Recommended Motion:** None- For information only.

**Comprehensive Plan Impact:** This topic is not addressed in the Comprehensive Plan.
