

**MEMORANDUM**  
**Economic Development**

DATE: October 4, 2021

TO: Susan Carmien, Purchasing Agent

FROM: Shelli Thurston, Economic Development Marketing Manager

RE: Bid waiver request for REGENESIS Remediation Services (RRS) for in-situ remediation at Middlegrounds Landfill

---

Economic Development is pursuing remediation strategies at Middlegrounds Landfill which involve usage of RRS. The technology used by RRS is a trademarked product called PlumeStop® Liquid Activated Carbon™. This will rapidly remove groundwater contaminants and expedite concentration reductions.

Economic Development uses AKT Peerless Environmental Services as the consultant for Middlegrounds Landfill. AKT Peerless has highly recommended this technology for its applicability to the contaminants at our site.

This is a patented product offered only by RRS. As such, I am requesting a bid waiver so that we may use this highly successful product offered by RRS, which is not offered by any other vendor.

Approved.

---

Susan Carmien, Purchasing Agent
