EXPLANATION TO COUNCIL BILL

ORIGINATING DEPARTMENT: Public Works & Transportation

PURPOSE: To authorize execution of a Municipal Agreement with the Missouri Highways & Transportation Commission (MHTC) for public improvement under which the MHTC will improve the intersection of Routes 59, 752 and U, to a double “T” intersection with dedicated right turn lanes.

REMARKS: MoDOT is requesting a municipal agreement with the City to work together to improve the intersection of Route 59, 752, and U, which has been an issue for some time now. This Agreement shall apply only to the portion of the improvement lying within the city limits.

This project has gone through all appropriate channels and the design with a double T design and dedicated right turn lanes was displayed in a council work session. Authorizing the agreement will allow for construction and maintenance to move forward on the project.

Public Works and Transportation staff recommend the authorization of this agreement and to move forward with the intersection improvements.
