Information Regarding the Estimated Maximum Annual Increase in the Amount of Ad Valorem Taxes on a Residence Homestead with an Appraised Value of \$100,000 to Pay the Debt Obligations (Bonds) Proposed Under Proposition A
<p>If the bonds authorized by Proposition A are approved, based on the assumptions set forth under "Assumptions Utilized in Calculating the Estimated Tax Impact" below, the County estimates that the maximum annual increase in the amount of ad valorem taxes on a residence homestead with an appraised value of \$100,000 to pay the bonds proposed under Proposition A would be approximately \$5.53.</p> <p><i>The pro-forma information contained in this box reflects the stand-alone impact of the bonds proposed to be issued under Proposition A as if the County did not have any outstanding debt obligations. It does not take into account the declining debt service on the County's outstanding debt obligations or the expected reductions in the County's current tax rate associated with the declines in debt service.</i></p>

**Assumptions Utilized in Calculating the Estimated Tax Impact**

If approved by the voters, the County intends to issue the bonds authorized by Proposition A in a manner and in accordance with a schedule to be determined by the Commissioners Court based upon a number of factors, including, but not limited to, the then-current needs of the County, demographic changes, prevailing market conditions, then-current market interest rates, the use of capitalized interest, availability of other revenue sources to pay debt service, assessed valuations of property in the County, tax collection percentages, and management of the County's short-term and long-term interest rate exposure. The estimated tax impact is derived, in part, from projections obtained from the County's financial advisor. Actual results may vary from the assumptions used in calculating the estimated tax impact. For the purposes of estimating the maximum annual increase in taxes identified in this table, the County utilized the following major assumptions:

<sup>1</sup> This Voter Information Document is provided in accordance with Section 1251.052 of the Texas Government Code. It is provided solely in satisfaction of the statutory requirements. The information contained in this Voter Information Document is based on certain assumptions, and actual results may vary from such assumptions. The information in this document addresses the impact of the bonds proposed under Proposition A. The County is also voting on Proposition B on the Election Date. For information regarding the impact of bonds issued under Proposition B, please refer to the separate voter information document for Proposition B. **The Voter Information Document is not intended to, and does not, create a contract with the voters.**

<sup>2</sup> The County has assumed the bonds will bear interest at an estimated rate of 4.50% based on current market conditions and the amortization schedule described in the Assumptions Utilized in Calculating the Estimated Tax Impact. The interest payable on the bonds may differ based on market rates at the time the bonds are issued.

<sup>3</sup> The information contained in this table reflects the County's outstanding debt obligations as of August 15, 2023, the date the Commissioners Court approved an order calling the election.

(1) The County has assumed the issuance of a single series of bonds in fiscal year 2024. However, the County may determine to issue the bonds annually over a multi-year period, which would reduce the estimated tax impact.

(2) For the purposes of these projections, it has been assumed that the bonds issued under Proposition A would be amortized over 20 years as shown in the following schedule. The following is an estimated pro forma debt service schedule based on these assumptions. It shows the County's debt service on currently outstanding bonds and the estimated debt service on the bonds, if authorized under Proposition A:

(3) The County has assumed the bonds would bear interest at an estimated rate of 4.50%.

(4) The County has assumed that the taxable assessed value within the County will grow at a rate of 4% per year for years 2024 through 2028 followed by no growth thereafter. The County has assumed a tax collection percentage of 100%.

(5) The County did not apply any exemptions in connection with this calculation. A homeowner may qualify for exemptions not considered in calculating the tax impact, such as exemptions for the elderly and disabled.
